

Amendment
Dated 7 May 2008
Re: USSN 10/632,133
Page 2

Please amend the following paragraphs of the specification in the manner indicated:

Before paragraph 0001, please amendment the following paragraph as indicated below:

This application is related to the following US patent applications filed by the assignee of the present application: USSN 09/495,153 entitled "Methods and Arrangements for Improved Paper Handling Based on Printer Configuration Status Information" filed January 31, 2000 (Now US Patent 6,646,758); and USSN ~~10/632,133~~ 10/632,132 entitled "~~Print Job Assignment System in a Reconfigurable Reconfiguration of a Computer-Based Printing System~~" filed 30 July 2003.

[0076] The ~~next next~~ step, is to iterate through the configurable components and to analyse them to find a set of a priori plausible reconfigurations. A plausible reconfiguration is one that is, in some way, related to the requirements of the job. For example, if the job needs some green paper, but no red paper, loading green paper into a paper tray is plausible, loading red paper into a tray is not.

Please enter.
